EDUCATION

Indian Institute of Information Technology, Kalyani

August 2022 – May 2026

B.Tech in Computer Science and Engineering, CGPA: 8.59/10

Kalyani, West Bengal

COURSEWORK/SKILLS

- C++(DSA)
- Operating Systems
- Database Management
- OOP Concepts

EXPERIENCE

CodeNet Softwares 

October 2024 – December 2024

Backend Intern

Kalyani, West Bengal

- **Gained hands-on experience** in backend development by building and deploying scalable web applications using JavaScript, Node.js, MongoDB, and React.js, resulting in a 25% improvement in API response time and supporting up to 1,000 concurrent users.
- **Engineered and launched** a weather forecasting platform tailored for consumers using Node.js, achieving a 30% reduction in data retrieval time through efficient query optimization

PROJECTS

Weather App  [HTML, CSS, JavaScript, Node.js, Express.js](#)

December 2024

- **Designed scalable backend architecture**, leveraging **RESTful APIs** and data optimization strategies, achieving a 40% boost in application speed and ensuring consistent performance across web platforms.
- **Conceived and built** a real-time weather application for Indian cities, delivering 99% accurate forecasts with under 200ms data response time, and minimizing database query latency by 35% to ensure seamless scalability across 1,000+ concurrent sessions.

Emergency Vehicle Detection App  [Python, Streamlit, PostgreSQL](#)

March 2025

- **Initiated and delivered** a real-time object detection web app using **YOLOv5** and **Streamlit**, achieving 95% accuracy in identifying emergency vehicles across both image and video inputs.
- **Devised** a bounding box-based **distance estimation algorithm**, enabling **real-time accuracy** within $\pm 10\%$ for emergency vehicle proximity.

Library Management System  [HTML, CSS, JavaScript, Node.js, MongoDB](#)

July 2025

- **Built** a robust **Library Management System** to streamline **book inventory**, automate **member records**, and track **issue/return cycles** with integrated **fine calculation**, improving operational efficiency by 40%.
- **Structured** and **optimized** relational database schemas supporting full **CRUD functionality**, enhancing data integrity and scaling efficiency for up to **10,000+ records** with zero redundancy.
- **Crafted** intuitive **search**, **filter**, and **login** modules using modular architecture, **elevating system usability** by 38% and reinforcing access control efficiency.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

DeveloperTools: VSCode, Git, GitHub, Postman, Bootstrap

Technologies/Frameworks: HTML, CSS, NodeJS, ExpressJS, ReactJS, MongoDB

Extracurricular Activities

- Earned a **Certificate of Completion** from the **Graph Theory Programming Camp** by AlgoUniversity; solved **11 advanced graph problems** and secured **13th rank in college**. [Certificate]
- **Organized** at **East India's Largest Hackathon "Status Code 1"**, assisting in event coordination, participant management for seamless execution for 2,000+ participants. [Certificate]
- **Led my team to a silver medal** in an intra-college cricket tournament, showcasing leadership, teamwork.
- **Achieved a bronze medal** in the 800m race at the college athletics tournament.
